 Gallagher, aged 4 years.
 At Merriwell, June 23, Maj. B. F. Whittier.

SUPREME COURT—CHAMBERLAIN—AUG. 2.—Before Justice LEONARD.
THE IMPRISONMENT OF VAGRANTS.
Last week the Judge released a prostitute from confinement on Blackwell's Island, on the ground of irregularity in the commitment, inasmuch as the warrant held them for three months, while the Revised Statutes provided that the term of imprisonment should not exceed sixty days. To-day another case of vagrants applied for her release by virtue of this decision, but in the mean time the notice of the Court having been

William M. Lathrop agt. John F. Sharrett et al.—*Motion to dissolve injunction denied, without costs.*

THE HOMOEOPATHIC MEDICAL COLLEGE.—One of the most bitter and relentless professional opponents of Homeopathy in this country, Dr. Wendell Holmes of Boston, in his address before the Massachusetts Medical Society, in May, said of Homeopathy, "its less" (that the 'inward bruises' of over-drugged victims "might be allowed to heal by the first intention), and

"must accept, whether we will or not." And if a
other assertion of his, in the same Address, be true
that, throw out wine, opium, "the vapors which pro-
duce the miracle of anaesthesia," and a few specific
which the medical art did not discover, he "firmly be-
lieves that if the whole materia medica, as now used,
could be sunk to the bottom of the sea, it would be
all the better for mankind—and all the worse for the
doctors."

"the fishes"—if this also be true, then the most strenuous advocate of dosing should rejoice that we have a Homoeopathic College. Whether it be so or not can be said of that system, it is certainly not what some thing urged against it, that its medication is absolutely nothing, and therefore is better than Dr. Himee's remedy, for it does a good deal for a humane sacrifice for the good of man.

At any rate, as a great many people do certainly believe in Homeopathy, be it medicine or moonshine, as its practice requires at least as much study and knowledge as is requisite in any other school, it is more than just and wise that it should have its own College. The last Legislature seems to have taken this view of the case, and granted a charter for such an institution to a number of gentlemen in this city.

This College is now organized by the appointment of a Board of Trustees and a Faculty of Medicine, the former including the names of several well-known citizens, and the latter some of the most distinguished among the physicians of that school. The season for 1860-61 commences on the 15th of October.

THE SIBERIAN GOLD PLACERS.—*The Gazette of India*

koutsk gives an account of the product of gold for 1838 in Eastern Siberia. It amounted during that year to 40,789 pounds, not including a single mass of 40 pounds found in the Spasski placer, belonging to Mr. Podolskoy, Jr. This is a decrease of more than three thousand pounds from the yield of 1838; the number of laborers was less by some 5,000 owing to the extreme cold and the hard and dirty companies.

dearths of food. A hundred and sixty companies are engaged in gold mining. Last year there were at the placers 26,112 men and 572 women, belonging to 13 governments of Siberia, and 5,081 men and 29 women coming from Great Russia. Of these 1,977 attempted to escape, and 308 were caught and sent back to the mines. There were 303 Cossacks at the placers. The number of horses employed is 12,284; 345 persons have

ANNEST COLLEGE.—The Mather prizes, established by the Hon. Henry Mather of Binghamton, N. Y., for the benefit of the Greek department in the

institution, and yielding \$85 a year, have been a ward of the State since 1870.
